

waste management is  
a Global challenge

Global:  
3.4 – 4.0  
billion tons of  
waste generated  
every year

Kenya:  
3.6 – 4.0  
Million tons of  
waste generated  
every year

### Current Solutions

15%  
Other

18%  
Recycled

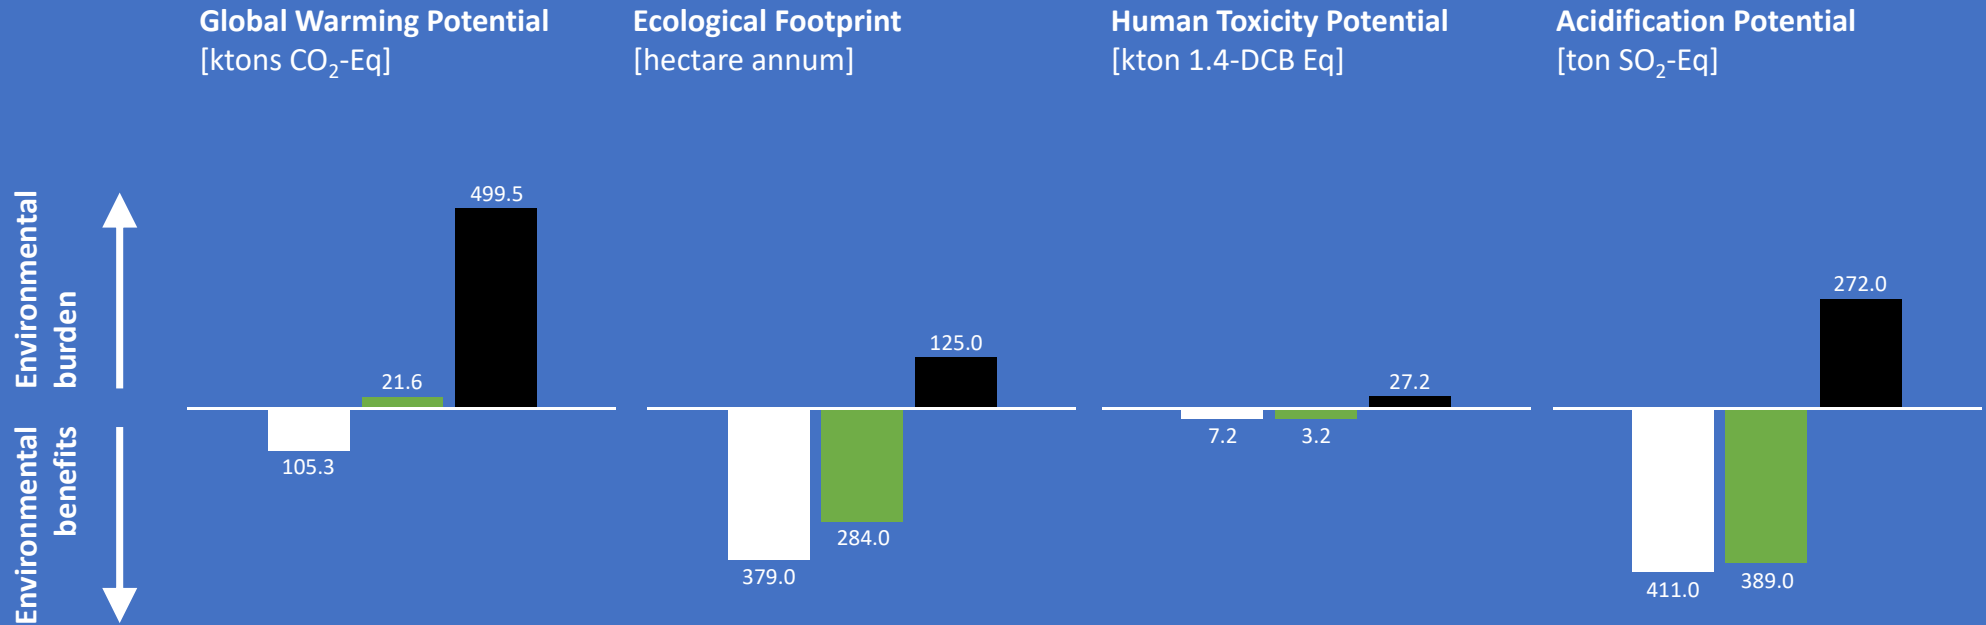

16%  
Incineration

10%  
Dump

41%  
Landfill

# Advantages of co-processing

- Co-processing
- Incineration
- Landfilling

Life-Cycle Assessment for treatment of 120,000 tons industrial and municipal solid waste in Slovakia, comparing the Global Warming Potential, Ecological Footprint, Human Toxicity Potential and Acidification Potential of co-processing, incineration and disposal in a sanitary landfill.

Source: Ecorec Eastern Europe, 2012

# Co-processing: A safe and sustainable solution

- Full traceability along the process- Tracking Document
- Complete destruction,
- certificates of destruction
- protecting your brand and reputation

## Advanced technology

- high temperature,
- long residence time
- state of the art filter technology
  
- Trustful partner with a global network and excellent track record
- Operating fully Licensed facilities
